

ZixMail®

End-to-End Email Encryption

Who uses Zix?

14,500+ customers including:

- All Federal Financial Institutions Examination Council (FFIEC) regulators
- 30% of U.S. banks
- 1,200+ U.S. hospitals
- 30+ Blue Cross Blue Shield (BCBS) organizations

Benefits:

- Irrefutable proof of delivery and receipt
- End-to-end protection of confidential data
- Ability to send to anyone, anywhere
- Secure portal delivery for non-Zix users
- Support for any email environment

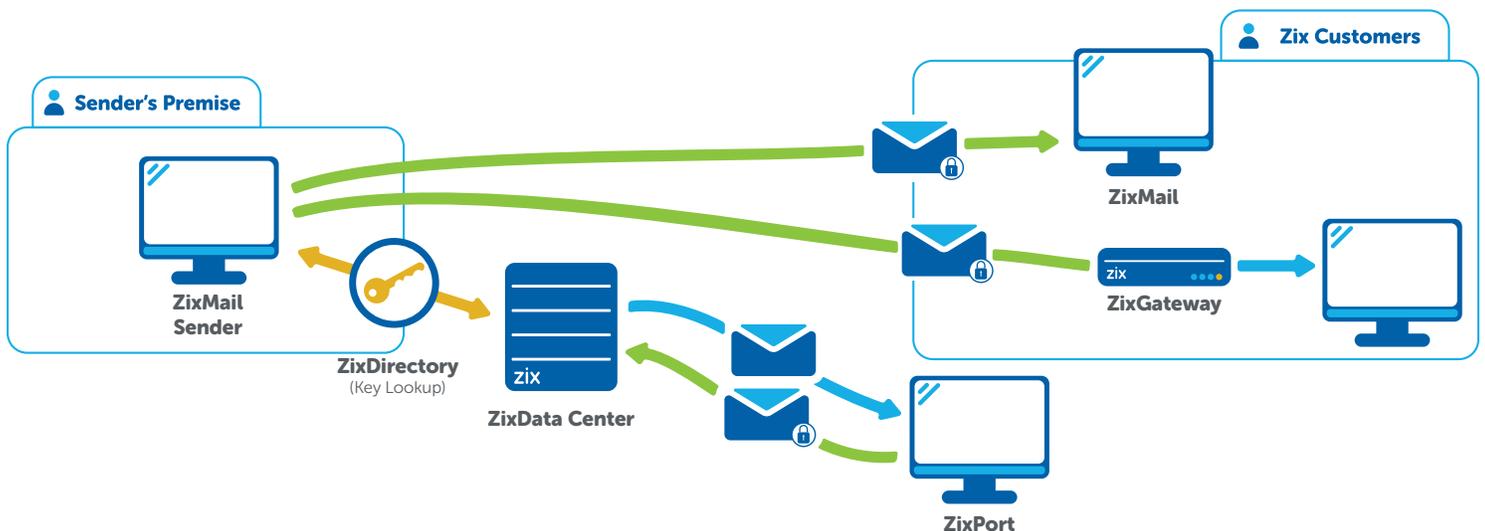

Features:

- Time-stamping and authentication for non-repudiation
- Encryption of email at rest and in transit
- Patented Best Method of Delivery
- Integration with ZixPort
- Outlook plug-in or standalone client

As part of Zix Email Encryption, ZixMail provides end-to-end email encryption that includes automated key management and delivery to anyone, anywhere through a secure web portal. You can use it with any corporate or web-based email system, and optional plug-ins are available for you to integrate it in with your Microsoft Outlook® client.

Send-to-Anyone Security

ZixMail makes it easy to securely send and receive confidential information to anyone, anywhere by using our patented Best Method of Delivery. When you send an encrypted email, ZixMail automatically determines if the recipient is another Zix customer by checking ZixDirectory, the world's largest public key repository. If the recipient is a Zix customer, ZixMail automatically encrypts and sends it using the recipient's public key. ZixGateway customers receive emails transparently, and ZixMail customers receive the email encrypted in their inbox.

About Zix

Zix is a trusted leader in email data protection. Zix offers industry-leading email encryption, a unique email data loss prevention (DLP) solution, and an innovative bring your own device (BYOD) email solution to meet your company's data protection and compliance needs. Zix is trusted by the nation's most influential institutions in healthcare, finance and government for easy-to-use secure email solutions. For more information, visit www.zixcorp.com

If the recipient is not a Zix customer, ZixMail automatically sends your email to ZixPort®, a secure messaging portal that can be used to deliver secure email to any email address. As a hosted solution, ZixPort is managed by Zix in the ZixData Center™, which is a SysTrust/SOC3 certified, SOC2 accredited and PCI Level 1, DSS V3.1 compliant facility that has a track record of consistent 99.999% availability. ZixMail comes with full support for ZixMessage Center™, a ZixCorp-branded portal. You can also purchase your own branded ZixPort portal to reinforce your corporate identity.

Outlook Plug-ins

For Microsoft Outlook users, Zix provides a ZixMail plug-in so you can send and receive encrypted email without ever leaving Outlook. The plug-in integrates the ZixMail functionality directly into Outlook's toolbar. The simple click of a button is all it takes to encrypt or decrypt a message.

Corporate Key

If you are a company that needs to have employees use ZixMail to protect sensitive corporate data but you need to make sure the company can decrypt employee-encrypted emails, ZixMail provides support for a Corporate Key. When the ZixMail Corporate Key is enabled, any employee-encrypted email can be decrypted without having access to the employees password or private key. With the Corporate Key, encrypted emails can be opened even after the employee has left the company is necessary.
